

RAVI PAIKINE

Aspiring DevOps Engineer | Cloud, CI/CD and Infrastructure Automation

Pune, Maharashtra | +91 8446931145 | rpaikine@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with hands-on project experience across CI/CD (Jenkins, Docker), AWS cloud infrastructure (EC2, S3, IAM, VPC, Lambda), containerization, and Linux and networking fundamentals, built on a strong technical foundation from 5+ years at Amazon working directly with AWS services, cloud architecture, and customer environments. Currently building Kubernetes, Terraform, and monitoring (Prometheus, Grafana) skills to round out an end-to-end DevOps toolchain. Comfortable with IaC, Git-based version control, and building scripting skills in Python and Bash. Immediately available.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda, RDS, CloudFormation, CloudWatch); learning Azure & GCP fundamentals

Containers & Orchestration: Docker, Kubernetes (fundamentals, hands-on practice)

CI/CD: Jenkins (pipeline setup & builds), Git, GitHub; exposure to GitHub Actions

Infrastructure as Code: CloudFormation; learning Terraform

Monitoring & Logging: CloudWatch; learning Prometheus & Grafana

Networking: IP networking, DHCP, DNS, VLANs, subnetting, routing, Security Groups, NACLs, NAT Gateway, IGW

Operating Systems: Linux (Ubuntu): CLI, configuration, service management, log analysis

Scripting: Bash/Shell scripting basics; building hands-on practice in Python

Practices & Tools: Jira, Confluence, SOP/runbook authoring, SSH/RDP, AWS CLI

TECHNICAL PROJECTS

AWS Secure VPC Infrastructure

- Designed a secure VPC with public and private subnets, IGW, NAT Gateway, Route Tables, Security Groups, and NACLs; configured least-privilege IAM roles and CloudWatch monitoring.

CI/CD Pipeline for Java Maven Application (Jenkins and Docker)

- Built a Jenkins pipeline to automate build, test, and packaging of a Java 21/Maven app on Ubuntu; containerized the artifact with Docker for repeatable deployment, using Git for version control.

Static Website Hosting on S3 and CloudFront

- Deployed an HTML5/JavaScript app on S3 with bucket policies and a CloudFront distribution for secure, scalable static hosting.

Containerized Python Application (Docker)

- Containerized a Python application using multi-stage Docker builds and container networking.

PROFESSIONAL EXPERIENCE

AWS Customer Service Associate

Sep 2020 - Apr 2026

Amazon, Pune

- Worked directly with AWS core services (EC2, S3, IAM, VPC, Lambda), diagnosing and resolving infrastructure, networking, and configuration issues in live customer cloud environments.
- Troubleshoot VPC, subnet routing, Security Group, NACL, DNS, and DHCP issues, building deep practical fluency in cloud networking.
- Used SSH and AWS CLI to remotely access and reconfigure cloud environments without on-site intervention.
- Owned incidents end-to-end: root-cause analysis, documentation, and resolution, consistently meeting SLA targets across 1,000+ cases.
- Authored Confluence runbooks and knowledge base articles, and mentored teammates on structured troubleshooting, building habits that translate directly to DevOps documentation and on-call practice.

EDUCATION

Bachelor of Engineering, Mechanical Engineering | Marathwada Mitra Mandal Education Society, Pune | 2018

Immediately available to join. Happy to work from office full time.
